Hand protection for switching operations

With this information we introduce two new members of BSD arc protection glove family. These two type of gloves are leather composite gloves with a mechanical protecting and arc resistant leather palm and arc resistant fabric backhand.

Both gloves provide you the mechanical grip of leather and the comfort and breathability of fabrics.

CE Certificate

Both types are CE certified according to EN 388 and EN 420 and therefore applicable in all situations where not only arc protection is necessary.

ATPV rating

The glove type HRC 3 has a high ATPV rating of **31 cal/cm²**. Due to an additional Kevlar layer inside of glove type HRC 4 this product has a higher ATPV rating of **45 cal/cm²**.

BSD gloves for every electrical purpose and risk category!
